

Being our first Keeping Kids Safe Project digital fingerprinting event here at Atwood Chevrolet, I have to admit that I was slightly nervous letting someone else take the reigns on putting together an event for our dealership. We strive on providing the best service to our customers and community. I can honestly say that the S.I.P. Kids coordination team delivered on their promise to put together a fantastic event.

Our lead coordinator, Jacki Powers, brought together many of our different child safety services, law enforcement, and youth organizations to provide expert safety information as well as fun interaction for the children. She worked diligently to coordinate a great hassle free event that allowed us to focus on our own work.

Our S.I.P. Kids event staff representative, Nancy Meeker, was wonderful. She was very patient and kind to all the children and families and answered any questions they had. We are very pleased with our event and are excited to see what they put together for us next year.

Thanks S.I.P. Kids!
