LONGWOOD, FL

What a fun weekend we had hosting our first Keeping Kids Safe Project Free Digital Fingerprinting event! Our S.I.P. Kids representative, Tabatha, was a delight and very patient and caring with all the families that attended. He was very helpful in answering any questions or concerns that parents had about the program as well as safety issues.

From beginning to end, Jacki Powers, our S.I.P. Kids coordinator, took care of most of the details, letting us focus on our customers. She contacted our local Police and Fire Departments to invite them to attend our event and educate parents on how to keep their families safer. Jacki also researched different organizations throughout our community to attend and show parents just what our area has to offer them including the United Way, Water For Life, JGroove Studios, J97.5 FM, and more! It was such a pleasure to have a team dedicated to helping us give back to our community.

This was a great experience for our dealership as well as our community, and we are very excited to work with the entire S.I.P. Kids team to host our next Keeping Kids Safe Project Free Digital Fingerprinting event!
