This was our first event with SIP Kids and we were very impressed with our Keeping Kids Safe project event this weekend. We really like events that flow smoothly and this one was exceptionally great because it was effortless on our end. We had a team assigned to our event that did all of the legwork for putting it together for us. We appreciate this because it allows us to maximize our resources, and yet still have a wonderful event.

This weekends event created a great atmosphere for our customer that were here to do business, the positive energy alone encouraged smiling faces and enthusiasm! There were a lot of different activities lined up with several local organizations to ensure everyone had a good time. The Sip Kids staff was professional with all the families and did a good job with all the children who participated in the digital fingerprinting. We are happy this event turned out so well and that we could have a positive impact on our community. We definitely enjoyed the great turnout of 368 children to the event and we recommend this programs to others!

Thank you,

The Gene Messer Hyundai Family
