

We would like to thank the S.I.P. Kids Team for giving us the pleasure of hosting our 3rd Annual Keeping Kids Safe Project digital fingerprinting event. Not only were we able to provide the families in our community with expert safety information, but it also allowed Honda to become a child safety advocate. Each year through S.I.P. Kids, we get the opportunity to give back to our community and get to know the families and their needs.

The S.I.P. Kids coordinators brought together our local law enforcement and fire protection agencies to help us provide parents with as much safety information as possible to help them protect their children. Their events are hassle free, and we at Honda were able focus on our own work and be confident that our event would be a success.

On behalf of Honda Morristown, I would like to thank the S.I.P. Kids team for once again putting together a successful event. We definitely recommend their digital fingerprinting program to anyone looking to bring in new faces and give back to their community.

Sincerely,
Chris Lykens
Sales Manager
