

Lewes Auto Mall just hosted an amazing event hosted by S.I.P. Kids and the Keeping Kids Safe Project. The event team brought to our dealership free digital fingerprinting, as well as numerous activities including carnival games and face painting. The event team also was able to coordinate with many local businesses and youth organizations to make appearances as well. This service helped spread the word about child safety and brought our community together for such a great cause.

To help us out during the two-day event Kelly, our S.I.P. Kids Representative, constantly made sure everything was running smoothly and consistently. We could tell the families felt welcomed and were reassured by his/her abilities to interact with the children.

By offering a free child's safety fair to communicate valuable information to community members, we are confident that families will feel safer and more knowledgeable about how to successfully keep kids safe. We thank S.I.P. Kids and would love to see them again in the near future to host another great event!
